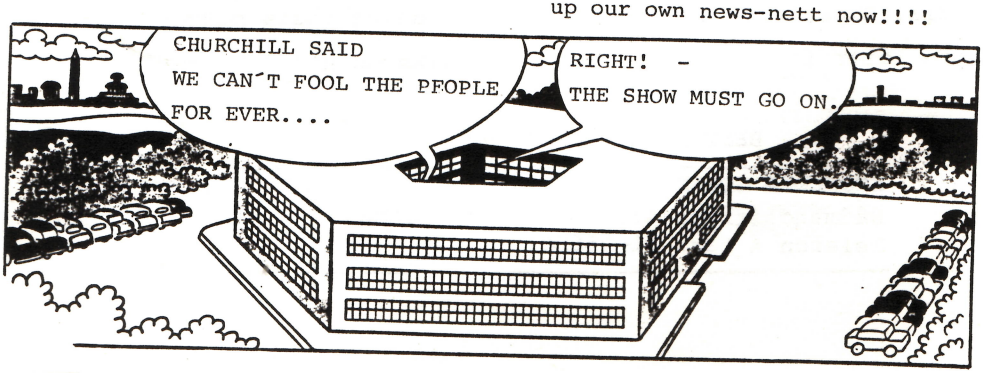
STUDENT REVOLTE IN ITALY

January, febuary, marts
In Italy all the universities had been squadert for many month. The newspapers don´t write about it - only two articles in all danish newspapers! We don´t know what happend. Why? Are "they" afraid of something? We must build up our own news-nett now!!!!



DEAR FREIND!

THIS IS THE ALTERNATIVE NEWS-NET

"EKOMEDIA"

EKOMEDIA is a "newsbyro" whith offices in many countries. All work together collecting "small news" in a little paper in english an send it around to the other offices. That´s the ekko-effect....

It´s up to each office, to make a "paper" in the local language, so it can be used by alternative papers, media an local radiostations in their area. This should work both ways: The media an groups could send news to the office and then the office would print it in it´s paper and send it to the others....

Today there is many global computer-net and that give US fantastic posibilities to make a real news-net among all the movenemts. BUT it´s very important that "some" collects "small news" localy so we all can know what happens globaly....

Each office is very autonomious, and you get the news from all of them, when you send the first news from your area. Today lot of news never get through the official media. Experience from "groups" and idears there better come later than never - that´s the news we help through!

"BLACK HORSE" smashed in Denmark

Denmark marts 1990

Freiday 2. february the "Black Horce" was brutaly smashed. 4 sqauders-kollektives, home for more than 70 people, was made unable for livving in one blow. The cops attacked the sqauder´s houses with the help from a big container car. Standing on top of the container, they jumped in the windows of the first floor,and on short time it looked like a bomb was fallen. Nobody was hurt! As an excuse for this sudden an brutal action the police spread a big lie, that was printed in all the newspaper´s. As a tactical move, to take the power from the people, the police lied! They told that the squaders had set op a "police-trap" the evening before - where some police men, should have been attacked by 30 people whith batts. It was a lie - but they smashed the houses! Since then the police has bin holding the empty houses under close surveilance to prevent the houses from being sqaudet again. Now the sqauders have made a cooperative whith a lot of local movements in the city about building the houses up again, to "Yuongpeoples-kollektives", where people deside for them-selves and have open workshops for all people in the city.....

THE STRUGLE FOR "FREE PLACES" IN DENMARK APRIL 1990!

For years there has bin strugled for "free places" here in Denmark. But in the spring the aurthorities has commenced an offensive, with the eviction of "Black-Horce". Almost on the same time there has bin made a "local-plan" for "Christiania", that has bin home for now more than 900 people in 18 years. "local-plan" means a law that says that half of "Christiania" is to be evicted and the other half normalised. It is called democracy that people is forced to do it them-selves by law. The plan is a clever move to try to split people and groups in Christiania up against each other in the diskussion of the law. But even so that the plan has bin called an "outstreghed hand" from the "sickstem" - it has here in march bin rejected of an almost united Christiania!

The 1. of april the "sickstem" has made a workinggroupe, with people from all the ministeries, that is to found out of "something" about the Thy-camp - a little free village with 60 people. The 1 of april was also a "dead-line" for the squadert house Kapaw in Cobenhagen - the date is now moved out in uncertain future. The people in Kapaw do not know what will hapen with their home.

All the"free places" has the same demands: We want to decide ourselves and have the right to make small cafés, small craftsman-businesses and small homes! One day we must stand together about this! The whole society needs cheap solutions on "social problems" now! Is there any other solution for homeless and onemployed? "The free places" is the solution! We have a right to make small villagees.

KASHMIR DEMANDS FREEDOM!

March 1990

In the beginning of march persons from Kashmir was making a hunger-strike - in front of the danish parlament. They wanted to lead the attention to the blody oppression of the people of Kashmir. Yust now the country, north of India, is inastate of emergency-military, after the latest months of rebellion. All foreign reporters has bin thron aut of the country, and phone and telefax conections has bin cut. The rebillion is to be made silint. In Kashmir it has become a tradition to dig your grave before you go to demonstrations....

Kashmir demands its right to determine its own allegiance and form of goverment. According to the FN-konventions of the 13th of august 1948 and january 1949, the Indian goverment is pledged to hold election - this has never hapened! The FN-member-countries has therefore also a responsability for the "situation", that only has bin met by silence from sorounding world. Since 1948 partisans has made more than 29.530 minor batlles, costing lives - and who knows how many more when you get this message? In the meantime Pakistan and India has devived the little paradisaical country between them - but now the people of Kashmir demands their freedom!

PAPERBRIDGE - AN IDEA!

It is an old international dream to build bridges from coast to coast.... One practical way is to make PABERBRIDGES!

Whit telefax/computer and translation - is it today possible to print the same pages in many newspapers in different countries, at EXACTLY THE SAME TIME.

The idea can be useful for all people involved in networking. Different groups in a country or many countries can be connected to each other, in the same "forum". Official newspapers can be used. The studentmovements, peace- and environment movements and trade unions have papers all over the world!

The main thing whit the idea is, that people who read the PAPERBRIDGES can use them to exchange news, ideas and feelings in a few words, or to have a short dialoque around some discusion point. The "bridges" can even be used to take decisions: If somebody sends a proposal, and nobody speaks against it - it´s a decision. Otherwise there is a dialoque....

PAPERBRIDGE POLEN - DENMARK!

A paperbridge was built between the Danish and the Polish student-papers on the 1. feb 89. "Some" in the Danish student movement didn`t like the idea of a free dialoque among all the students - they blocked the bridge. BUT in the first paperbridge somebody proposed a paperbridge between the student-papers all over the world. Nobody talked against it of very good reasens, but they write: "The possibility of uniting the student movements all over the world exists. DON`T WORRY - BE HAPPY.....

NORWAY

- January, febuary, marts -

January in north of Norway, thousands of fishermen make demonstration against the goverment - they have big problems - the small communities are dying! Febuary elder people in Oslo demonstrate against cut´s. They get in dialouge whit the goverment very quick! In the big cities people talk about good aktions against cut´s, and in marts whole Oslo was "dead" - all public workers strike one day against the budget of the city. In febuary "they" deside to destroy "the young peoples house" BLITZ. But BLITZ had great sympati among the people. People in BLITZ was very happy to get the messege from a solidarity demonstration for them in Milano/Italy! In Norway people hope they will see solidarity in many countries - if BLITZ get smashed!

TOWNMEETINGS DIRECKT IN RADIO!

- AN IDEA -

Whith a combination of radio an wallpapers, is it today posible to call all people in town together into "big open meetings", direckt in radio! All in tawn can meets! Our only problem is, that we are too sceared for the microphone and too bad & boring to send direckt out in radio! BUT - if we find some new ways to make meetings where all feel more safe, equal and free - then we will have the key to renew our "demokracy".

"TINGMEETINGS"

AN OLD PRAKSIS IN UNITY AND EQUALNESS

- An meeting eksperiment -

In the good old days people up north in every part of the country, met around the old stone circles. We know that there some times was many hundrede - but how did they do it? We know all had a right to speak and all desisions was made when all agree.... but how? Let´s try to imagine - let´s try an eksperiment:

The stone circle was the "inner circle", from where people talk. Everybody could go in an be whith, the circle was "leving", and people around was standing and listening. The work of the "inner circle´s", was to keep peoples attention, in an inspired talk there throw light on what people want to clear up. The different point of views, keep the atmosfære alive, like everybody was climbing up of a "big mauntain" from all sides - until som catch "the timely word" - there move the whole situation up to a higher level - the top of the mauntain - from where all could see and all agree. Some groups had a symbol for "those timely words". The symbol could pass around so every point of view could be heard, but mostly the "symbol" was put out in the middel while the talk was going around the subject. If some "had it" and meant they had catched "the timely words", they took "the symbol", and had the others attention. Maybe she had it! Maybe all agree....

If we search together "direct in radio", and find "the situation", where all see.... then it´s posible to open the telephone whit the question: Do all agree?
